

Broadmeadow Junior School Sports Premium funding report 2024-2025

Time period	Amount of funding received	Amount spent	How the money has been spent	Effect of pupils' PE and sport participation and attainment	How we will make sure/have made sure the improvements are sustainable
July 2024 - July 2025	£18250.00	£14565.57	Premier Education Lunchtime and afterschool coaches	Engaging more children with PE and sport throughout the day	The children pay towards the cost of the afterschool clubs so this would continue to be the expectation if the Sports Premium was withdrawn.
		£1504.35	Equipment	Good quality equipment and ensuring there is enough of it means that all children can join in and access a variety of sports.	This would be an ongoing cost which would need to be incorporated into core budget or by holding sponsored events.
		£121.30	Transport and entry to competitions	Giving children competitive opportunities outside of school.	Children would need to pay a contribution in order to attend competitions.
		£1150	Membership of Central and Hall Green Sports Partnership	Children have had the opportunity compete in the Year 3, 4 and 5 virtual multi skills competition. We also had training for 12 playleaders who have worked hard running activities on the playground, keeping the children active as	We could fundraise or ask children to pay to go to these competitions, or look at organising them ourselves.

				well as developing their own leadership skills.	
		£834	RealPE membership	Staff subject knowledge is increased and children build on their skills as they move through the school. These skills enable them to access all sports at secondary school and create active adults who have the skills to take up any physical activity.	As an integral part of our curriculum, this would need to be funded from core budget.
		£562.95	Transport and tickets to watch a sporting event	This allowed a whole year group to experience a live sporting event which they would otherwise not have had the opportunity to attend.	We would have to ask for parental contributions or this opportunity would not be possible to offer.

Year 6 Swimming report:

28% could swim 25metres at the end of Year 6.

20% could perform a range of strokes.

94% could perform safe self rescue.
